Faculty of Information and Communication Technology

ITCS212 Web Programming

JavaScript: Lab-Week5-2

Instructions

1. Download **lab-week5.zip** from Mycourses and unzip it.
2. Examine the structure of the folder
3. In the folder, there is one html file called **Simple.html**, which have the interface as shown below:

In addition, the function of this web page is to add up two numbers. If an answer is positive, the colour of answer will be blue. Otherwise, it will be red.

4. From here, it is your work. You need to modify the web page to support three numbers as shown below:

A Very Simple Web Application

Addition Only

Add

© Faculty of Infomation and Communication Technology, Mahidol University

Moreover, the colour of answer should work with three number.

5 + 5 + 5 = 15

5 + 5 + -100 = -90

5. Next, the web application should show the text "(even)" or "(odd)" after the answer with different colour. (Hint: You need to work with label and css)

9 + 9 + 9 = 27 (odd)

9 + 9 + 10 = 28 (even)

6. Next, you need to add one more equation to work with subtraction as shown below:

7. Submission: Please zip all of your works into one zip file namely "**Lab-Week**5**-2-[Section]-[StudentID].zip**" and submit to the activity submission on Mycourses.
